

Software Testing

Browser Debugging

Browser Debugging

- Most web browsers have their own debugging environment.
- We will demonstrate how to use the debugging tools on Google Chrome.
- We will work with the program shown next

Web Page

```
<!DOCTYPE html>
```

```
<html>
```

```
  <body>
```

```
    <script src="greeting.js"></script>
```

```
    How to debug on a web browser.
```

```
    <script>
```

```
      greeting('Earthling');
```

```
    </script>
```

```
  </body>
```

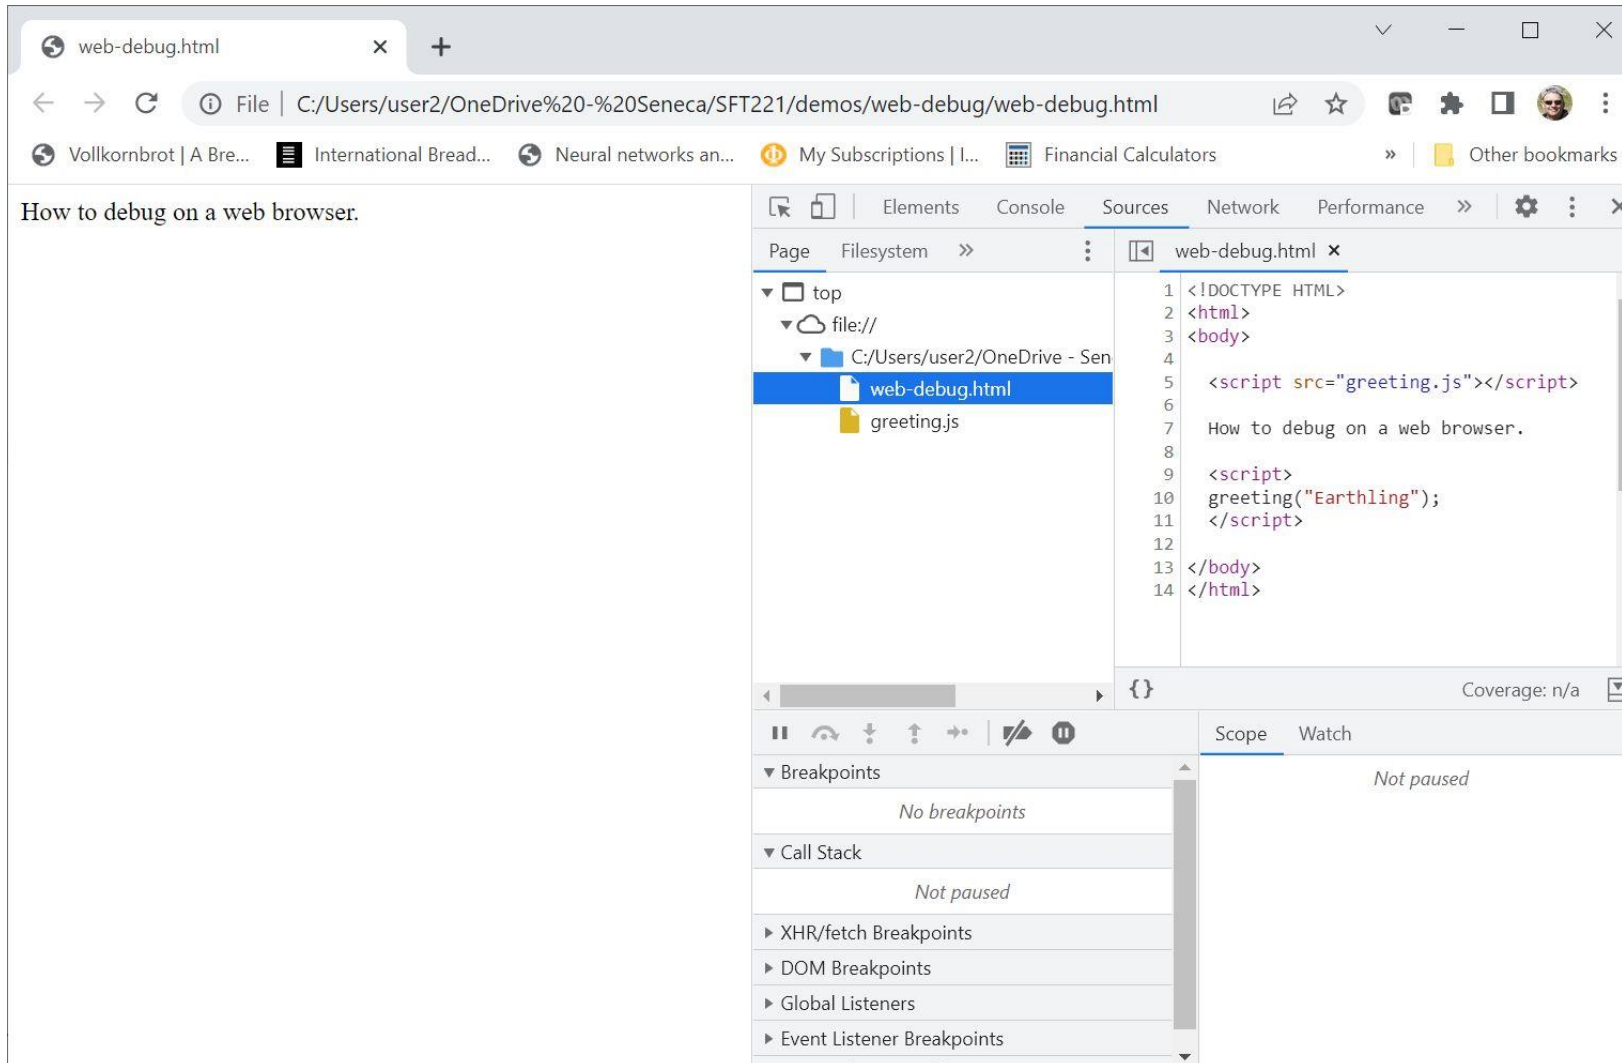

```
</html>
```

greeting.js

```
function greeting(name) {  
    let phrase = `Welcome, ${name}!`;   
    popup(phrase);  
}
```

```
function popup(phrase) {  
    alert(`** ${phrase} **`);  
}
```

Ctrl-shift-I for debug Panel
